Feevale Techpark graduates six more incubated companies.

18/01/2021 - Updated 2:04 PM

Feevale **Techpark** has graduated six more incubated companies: Mespper Tecnologia, Vinicius de TD do Prado, Mog Comunicação e Conteúdo, Arquea Projetos e Consultoria Empresariais, Akitti Acessórios, and Aline Stefanie Fenker. Now, the Feevale University technology park has a total of 56 graduated companies, reinforcing its objective of generating an environment of coexistence and synergy between the University and companies, to foster research, development, entrepreneurship, and innovation.

Feevale's Director of Innovation, Daiana de Leonço Monzon, emphasizes that the graduating companies demonstrate the success of a trajectory.

It is gratifying to see these companies overcome all barriers and complete a cycle, transitioning from incubated to resident companies and heading towards the market. We are very happy to know that we made a difference in each of their processes and that our synergistic environment helped them mature their ideas," he says.
